Instructions for using Bowling Green’s city tree inventory

Main Page on the left of the main page there is a list of tools that can be used to get information from the inventory. On the right are a + and – sign that can be used to zoom in and out.

Address Search

From the main toolbar on the left side of the page click the icon to select for a specific address.
Click on the Site button. Enter in the number location of the address underneath the Address heading. If looking for a range of locations on a street, enter the lower value in the top blank and the larger value in the bottom blank. Type and select the street under the Street heading.
Map Tools

Clicking on the  icon will let you access tools to manually select trees.

Clicking on the  icon will let you manually highlight a grouping of trees from the main map in a rectangular shape. It is possible to select several rectangular groupings of trees from the map.

Clicking on the  icon will let you manually highlight a grouping of trees from the main map in a shape selected by the users. It is possible to select several groupings of trees from the map at the same time.
Click on the upward arrow at the bottom right corner of the page to get a list of trees selected.

Clicking the icon will clear all selected trees.

Clicking on the icon will let you click on a green circle to select an individual tree from the map.
Clicking the right facing arrow on the pop up will display more information about the tree. The Site tab will show the address and the Species tab will show the tree species and size.
Clicking on the 💲 icon will show the environmental tree benefits for the individual tree.

To view the combined environmental tree benefits for all city trees in Bowling Green use either the 🌳 or 🌳 icons to select all the trees in Bowling Green. Then click on the 💲 icon to display the tree benefits.
Layer View

To change the view map so that it displays using Google Satellite click on the icon and select the Google Satellite base layer.
